

M.A. Ford® Integrated Manufacturing Solutions

Providing **Creative, Ingenious & Innovative** custom cutting tool solutions for our customers

Where **high performance** is the **standard**®

www.maford.com

Unique custom tooling for complex high performance machining applications

There are very few things that are truly unique, but every tool manufactured by our Custom Tool Division is as individual as the application it was designed for and the customer that specified it.

Since 1999, exactly 70 years after M.A. Ford® was founded, our Custom Tool Division has been designing and manufacturing precision high performance tooling to meet demanding machining applications where dedicated tools could provide significant advantages over 'off the shelf' solutions.

Built on almost a Century of manufacturing excellence and ongoing innovation, M.A. Ford custom tools are the pinnacle of engineering excellence that are designed to meet the unique and challenging demands of leading edge manufacturing businesses in the US and across the globe.

Where **high performance** is the **standard**

**M.A. Ford Custom Tool Division.
Dedicated tooling for improved manufacturing.**

“

M.A. Ford Custom Tool Division has been instrumental in helping us solve some manufacturing problems. In one instance we were having difficulty consistently producing close tolerance holes with tight position call outs. Many of the options we were presented with by other manufacturers were just not cost effective. M.A. Ford designed and manufactured a dedicated tool that was simple to use and very cost effective giving us consistent quality and cycle times with great tool life!

Supplier of precision turned and milled parts

”

“

Over the last year and a half, M.A. Ford has shown outstanding customer service and their team has continually gone out of their way to ensure that we get all the support that we need. Whenever I make a 'hot' request, the Custom Division always responds quickly and lets me know what to expect and what my options are so that I can make an informed decision. I would highly recommend M.A. Ford to anyone.

Specialist manufacturer for the global oil & gas drilling community
